- Diligence

EDUCATION

IT Technician

Zespół szkół elektronicznych i informatycznych in Giżycko

Drawing from over a decade of experience, I specialize in web development, particularly excelling in ReactJS paired with Node.js for the last 3 years.

My self-guided learning strategy involves utilizing Google and ChatGPT effectively. This approach helps me adeptly handle intricacies in freelance projects while staying abreast of current industry trends.

My expertise spans technical concepts, system architecture, programming methods, and more, enabling me to accelerate project delivery and provide robust solutions. Additionally, I thrive in international work settings and possess proficient English skills that facilitate seamless business communication

THE SCOPE OF KEY TASKS AND RESPONSIBILITIES

- Management of several projects at once (Fixing bugs, building and testing new functionalities, talking with clients to discuss user interface ideas).
- Developing and implementing highly responsive user interface components.
- Monitoring and improving front-end performance.
- Building backend and frontend using latest and most secure libraries.

THE COURSE OF PROFESSIONAL CAREER
